VMware Pro - VMware License Key

1 message

Thu, Aug 24, 2023 at 4:40 PM

Hi all.

When I registered my login to the VMware site, yes, it appears to use SSO (single-sign on) but no, it does not just use your userid, it uses the entire domain. So my userid to them is not fkatz, it is fkatz@georgiasouthern.edu. It will take any password, but for simplicity's sake, I used my SSO PW for MyGS. For me, that expires sometime this semester, but I bet I don't have to update the D2L VMware page.

I then went through the process in the attached Adobe pdf file created from the PowerPoint. Once I get the license key, I should be able to enter it into the input field and open up VMware Pro 17.x. If everyone is able to do that, then we can progress to the first lab next week.
